

## Day 12 - Pandas - Missing values and handling them

In real-life datasets, there would be a lot of missing data points. It is not easy to handle them. Simple ignoring them is not a choice. We need to understand the best ways to handle them better. Here are some really good resources to learn about the concept better.

- [Python Data Science Handbook](#)
- [Kaggle Notebook about handling missing data using a housing dataset](#)
- [Pandas Documentation on handling missing data](#)
- [A Towards Data Science Article about the topic](#)

Exercises:

- [Kaggle Exercise](#)
- [W3School Exercise](#)

Tutorial:

[Here is the link](#) to the tutorial video. It includes a few exercises question as well for more practice.
